

## QUALITY POLICY

Morte S.A. is a family business with a long tradition in the manufacturing and marketing of delicatessen products with the mission of being a reference in the High Quality Delicatessen market, knowing how to take care of its products and customers.

For this purpose we commit ourselves to:

- Implement a market orientation strategy that allows us to know continuously the requirements of our customers and final consumers, satisfy them in the demanded products and services, above all in this time of continuous changes, since Morte is a company oriented to quality and not quantity, and more focused on the small retailers than to large surfaces.
- Ensure the continuous improvement of processes and products and compliance of the internal requirements of Morte S.A., of the client, legal and Regulatory
- Promote our knowledge of these requirements in our company, through the training of our staff, enabling them to assume their responsibilities in terms of quality.
- Ensure the availability of the necessary resources for the attainment of quality objectives.

For this, I grant the necessary authority to achieve compliance with the guidelines expressed here, to the Quality Management Manager, who will be the representative of the Management in matters of Quality.

Josep Morte Masachs
